FULL-STACK WEB DEVELOPER

I am a full-stack web developer who values communication and optimization. I am excited to bring my passion for programming and creative problem-solving to a company that shares similar values.

TECHNICAL SKILLS

JavaScript | React.js, Handlebars.js | Node.js, Express.js | SQL, MySQL, Sequelize.js | MongoDB, Mongoose ODM, NoSQL | Git | HTML, HTML5, CSS, CSS3 | REST APIs | Agile Methodology | Visual Studio Code

---

PROJECTS

FARMER BARTER   May 2022
- Constructed a full-stack website specifically for gardeners to trade crops locally in order to reduce food waste. Users can submit posts where they either offer crops or request crops for trade or pro-bono.
- Implemented a relational database for encrypted user profiles and forum posts using MySQL and Sequelize. Only authenticated users can access the website and it conforms to REST API constraints.
- Catered to an average of 40 users per day and raised awareness on food waste.

BEER BUDDY   April 2022
- Collaborated with a team of four to build a front-end app for users to review local breweries and store their comments and ratings in a personal profile.
- Fetched data through a third-party API "Open Brewery DB" so users can search for all breweries for any city in the United States. Purely HTML, CSS, and JavaScript were used with Web APIs to add functionality. Utilized localStorage and JSON to store values without a database.
- Catered to an average of 40 users per day and increased the exposure and business for local breweries.

WORK EXPERIENCE

SYNOVUS BANK   Athens, GA
Position: Universal Banker   February 2019 – February 2022
- Maintained a database of legal documents and consistently met compliance standards.
- Collaborated with a small team of coworkers to meet sales goals and champion our customers.
- Problem-solved by curating financial solutions for customers based on their individual needs.
